

Blue Water Bridge Corporate Centre

Location: Pointe Edward, ON

Client: Blue Water Bridge Authority

Construction Manager: McKay Cocker

Architect: NORR

This 605,000 sq.ft. building integrates components into one building envelope with a central 3-storey atrium with intersecting bridge elements serving as a device to organize the agencies by programmatic functions, public access and secure operational requirements. The facility has achieved LEED® Silver certification and has implemented many sustainable design features such as: underwater cistern tanks for roof rainwater collection, solar water heating, and high efficiency mechanical and electrical systems.
