

CURVE APPEAL

Edmonton Tower

Location: Edmonton, AB

Client: First Street Building Corporation

Construction Manager: PCL

Architects: Stantec

The 29-storey, 716,604 sq. ft. Edmonton Tower is located in the Ice District and opened in early 2017. The tower is a AAA office building that is targeting LEED® Gold and features sustainable systems and state-of-the-art office, dining, and retail spaces. CGI provided design assist services on the project and used the Schuco UCC-65 curtain wall system, integrated LED lights into the caps. The lighting system is capable of projecting designs onto the face of the glass on the top four floors of the building, and these unique designs change regularly. The building also features curved external glazed envelope at both the north and south elevations, and the office floors have 8' clear vision glass to maximize natural light, and decorative metal cladding on the podium to highlight the customized artistic graphics.
